Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Amendment Entry

1. Applicant's amendment and response filed 3/20/02 in Paper No. 18 is acknowledged and has been entered. Claims 7-10 and 12 have been cancelled. Claims 1-6, 11, 13-16, and 32 have been amended. Claims 34-38 have been added. Accordingly, claims 1-6, 11, 13-16, 32, and 34-38 are pending and are subject to restriction requirement.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-6, 11, 13-16, and 34, drawn to an interactive system having an anticoagulant substance coupled to the linker, classified in class 436, subclass 69.
 - II. Claims 35-38, drawn to an interactive system having a physiologically active substance, i.e. protein, synthetic nickel-nitrilotriacetic acid coupled to the linker, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are independent and distinct inventions. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, have different

Art Unit: 1641

modes of operation, different functions, and different effects in that the substance coupled to the linker in the interactive system of Invention I is an anticoagulant and the substance coupled to the linker in the interactive system of Invention II is a physiologically active substance, i.e. protein, nucleic acid, and synthetic nickel-nitriloacetic acid (NiNTA). Thus, these groups encompass distinct and separate structural and functional requirements for evaluation of patentability.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Furthermore, because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Literature search for each system is distinct since the structural requirements of each invention are different. While searches would be expected to overlap, there is no reason to expect the searches to be coextensive.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gail Gabel whose telephone number is (703) 305-0807.
